

AVIATION EQUIPMENT CORPORATE CATALOGUE

Engineering excellence aligned with international standards,
certified safety, and long-term performance reliability.

AIRCRAFT MAINTENANCE AND ACCESS PLATFORMS

A professional access platform designed for aviation maintenance operations. It provides safe access to aircraft fuselage, doors, and **service** areas in apron and hangar environments.

With its high-strength steel structure, anti-slip steps, modular guardrails, and adjustable platform height, it easily adapts to different aircraft types.

AIRCRAFT MAINTENANCE AND ACCESS PLATFORMS

Technical Specifications

- Heavy-duty steel chassis
- Anti-slip aluminum steps and platform surface
- Lockable wheels system
- Mechanical height adjustment system
- Safety guard rail and hand rail structure
- Industrial-grade coatings suitable for apron conditions

www.kocmet.com

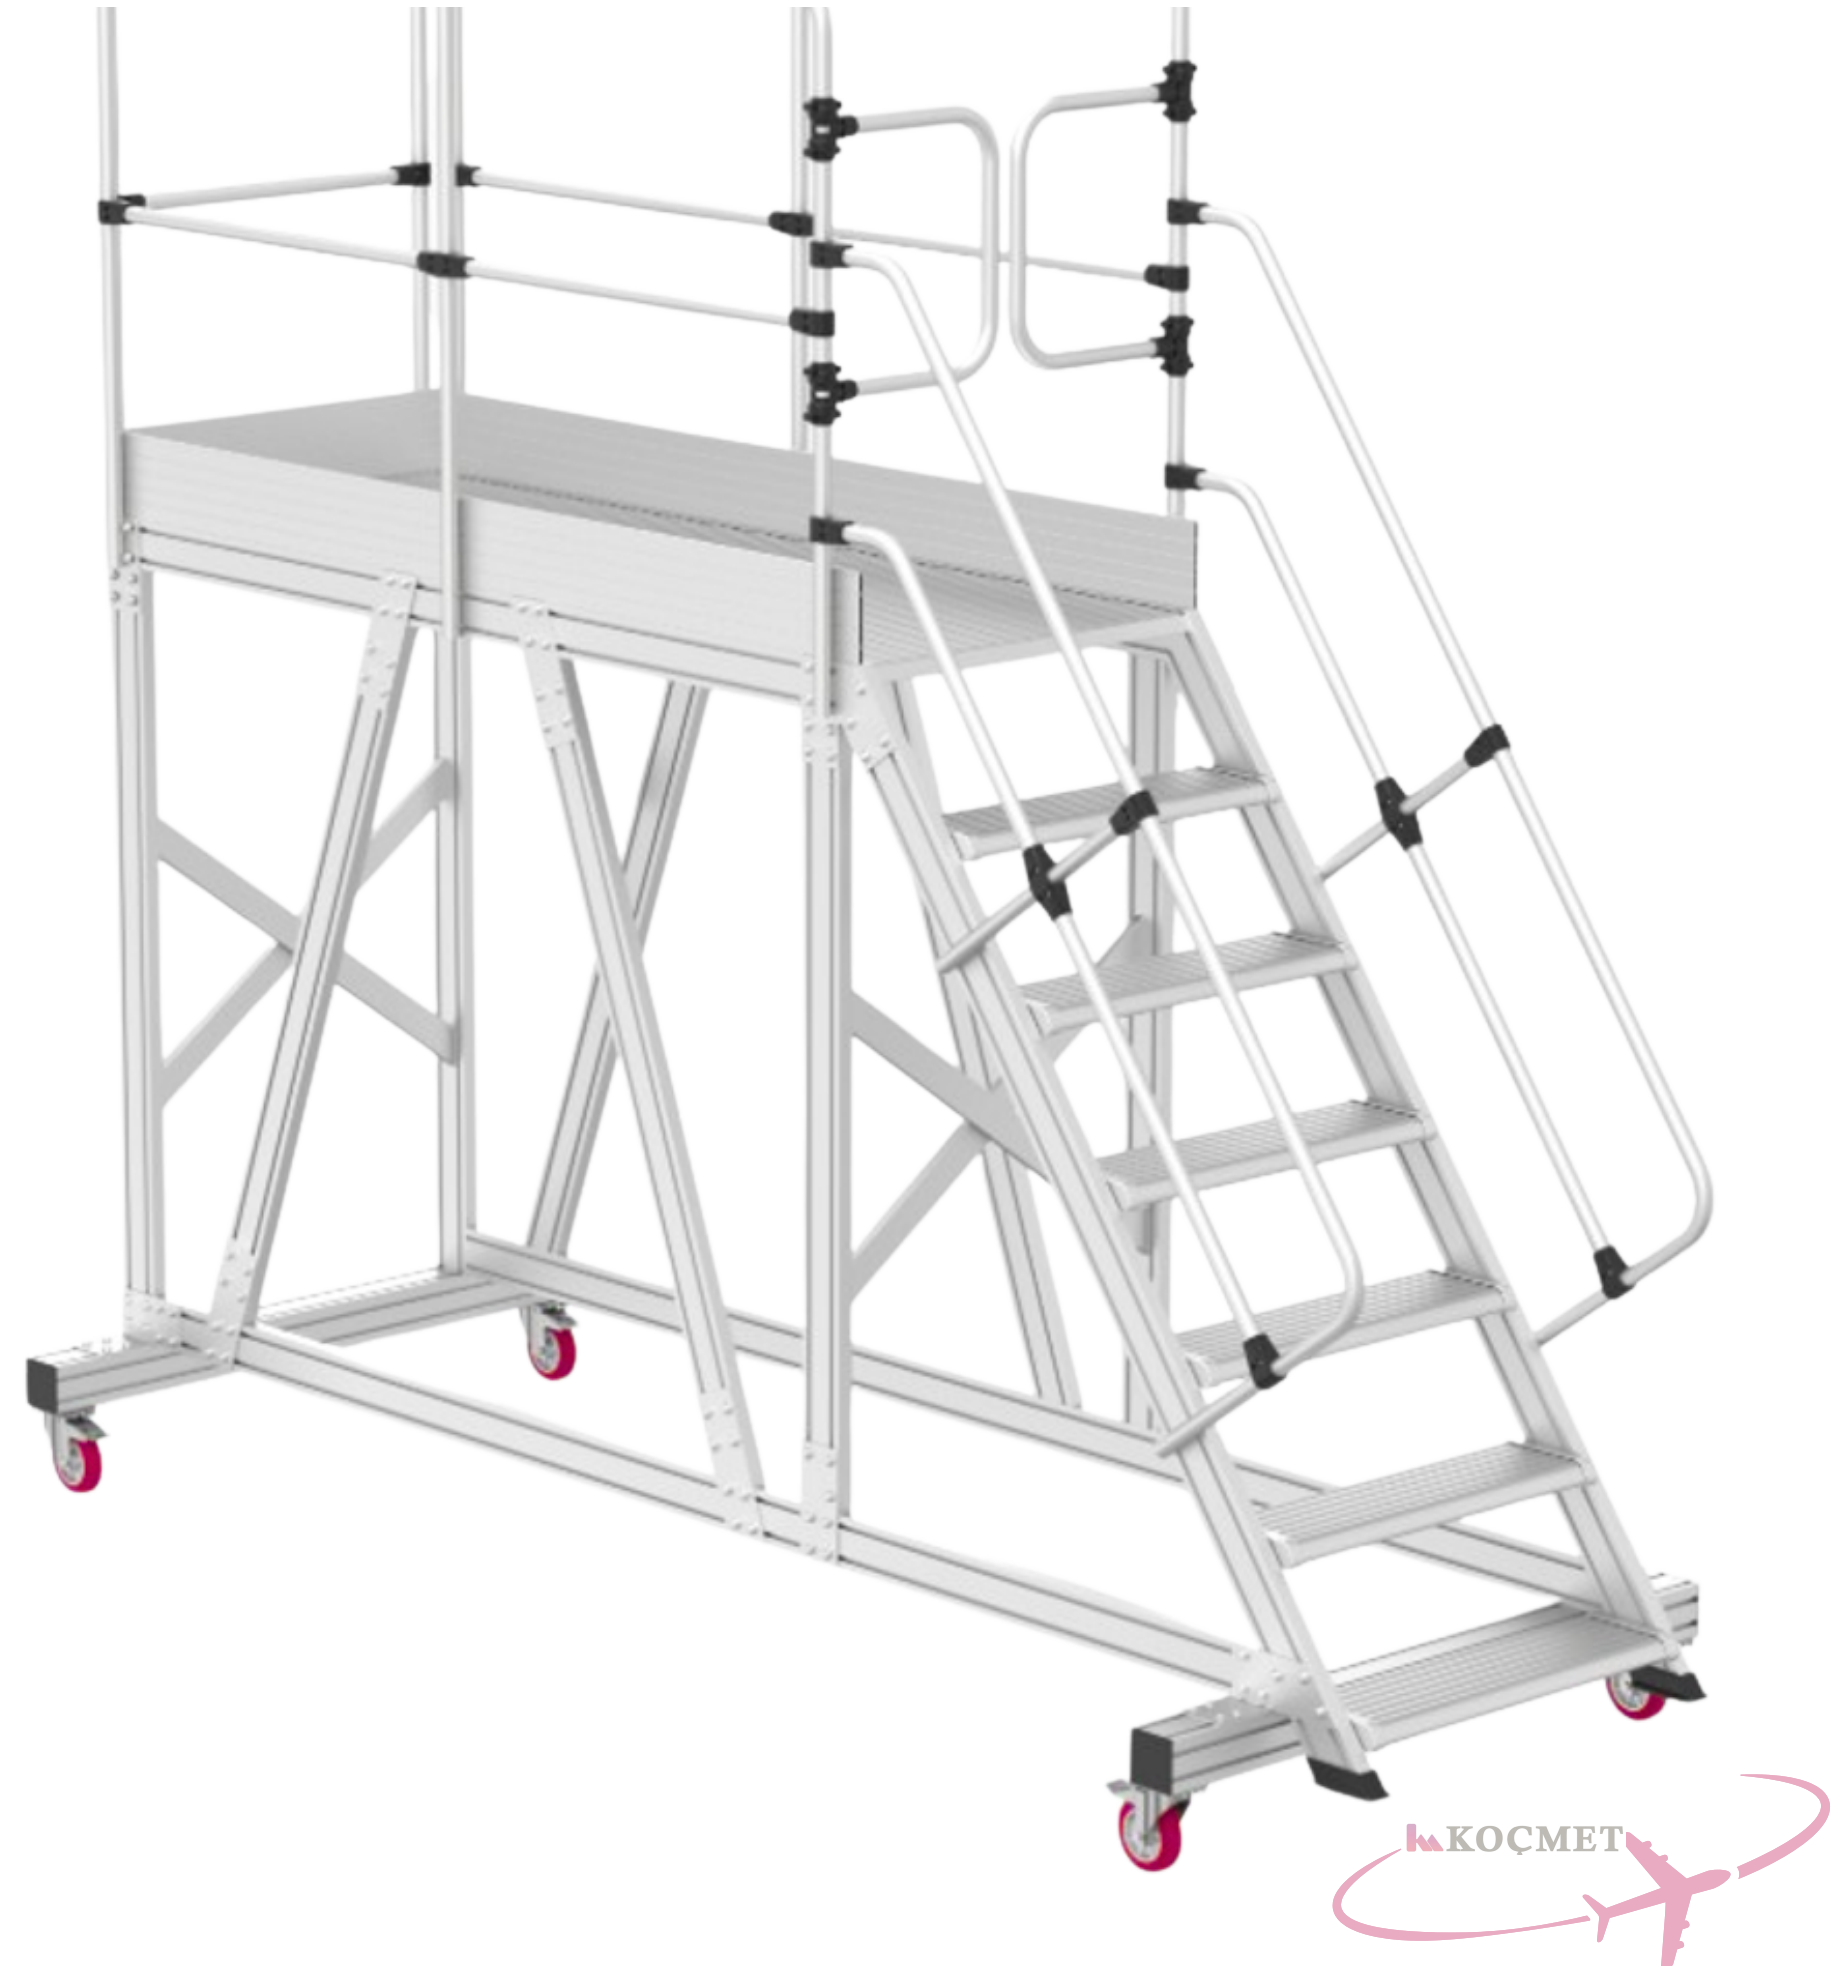

AIRCRAFT MAINTENANCE AND ACCESS PLATFORMS

Applications:

- Aircraft maintenance operations
- Cabin service and technical access
- Hangar maintenance activities
- Ground support operations
- Aircraft fuselage and door area access
- Line maintenance applications
- MRO (Maintenance, Repair & Overhaul) processes
- Apron-based technical service operations
- Fleet maintenance and inspection operations
- Maintenance activities requiring safe elevated access

www.kocmet.com

AIRCRAFT MAINTENANCE AND ACCESS PLATFORMS

EASE OF USE:

- 01** Ergonomic step design for safe and comfortable access
- 02** Stable working area with non-slip platform surface
- 03** Lightweight and modular structure for easy positioning
- 04** Quick stabilization with lockable wheel system
- 05** Fast installation and practical operation

AVIATION GROUND SUPPORT AND LOGISTICS EQUIPMENT

Transportation, lifting, and access systems used in apron, hangar, and maintenance operations, designed to ensure safe, efficient, and controlled operational processes.

With a comprehensive product portfolio ranging from manual transport carts to scissor lift systems, and from component lifting units to service platforms, it delivers integrated solutions for aircraft maintenance and ground handling operations.

Featuring high-strength steel construction, industrial-grade wheel systems, and ergonomic design, it provides long-lasting performance under demanding apron conditions.

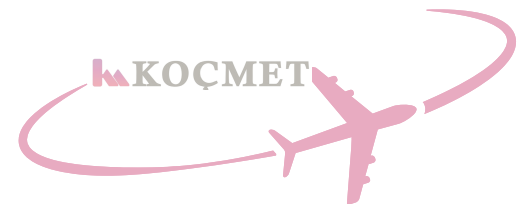

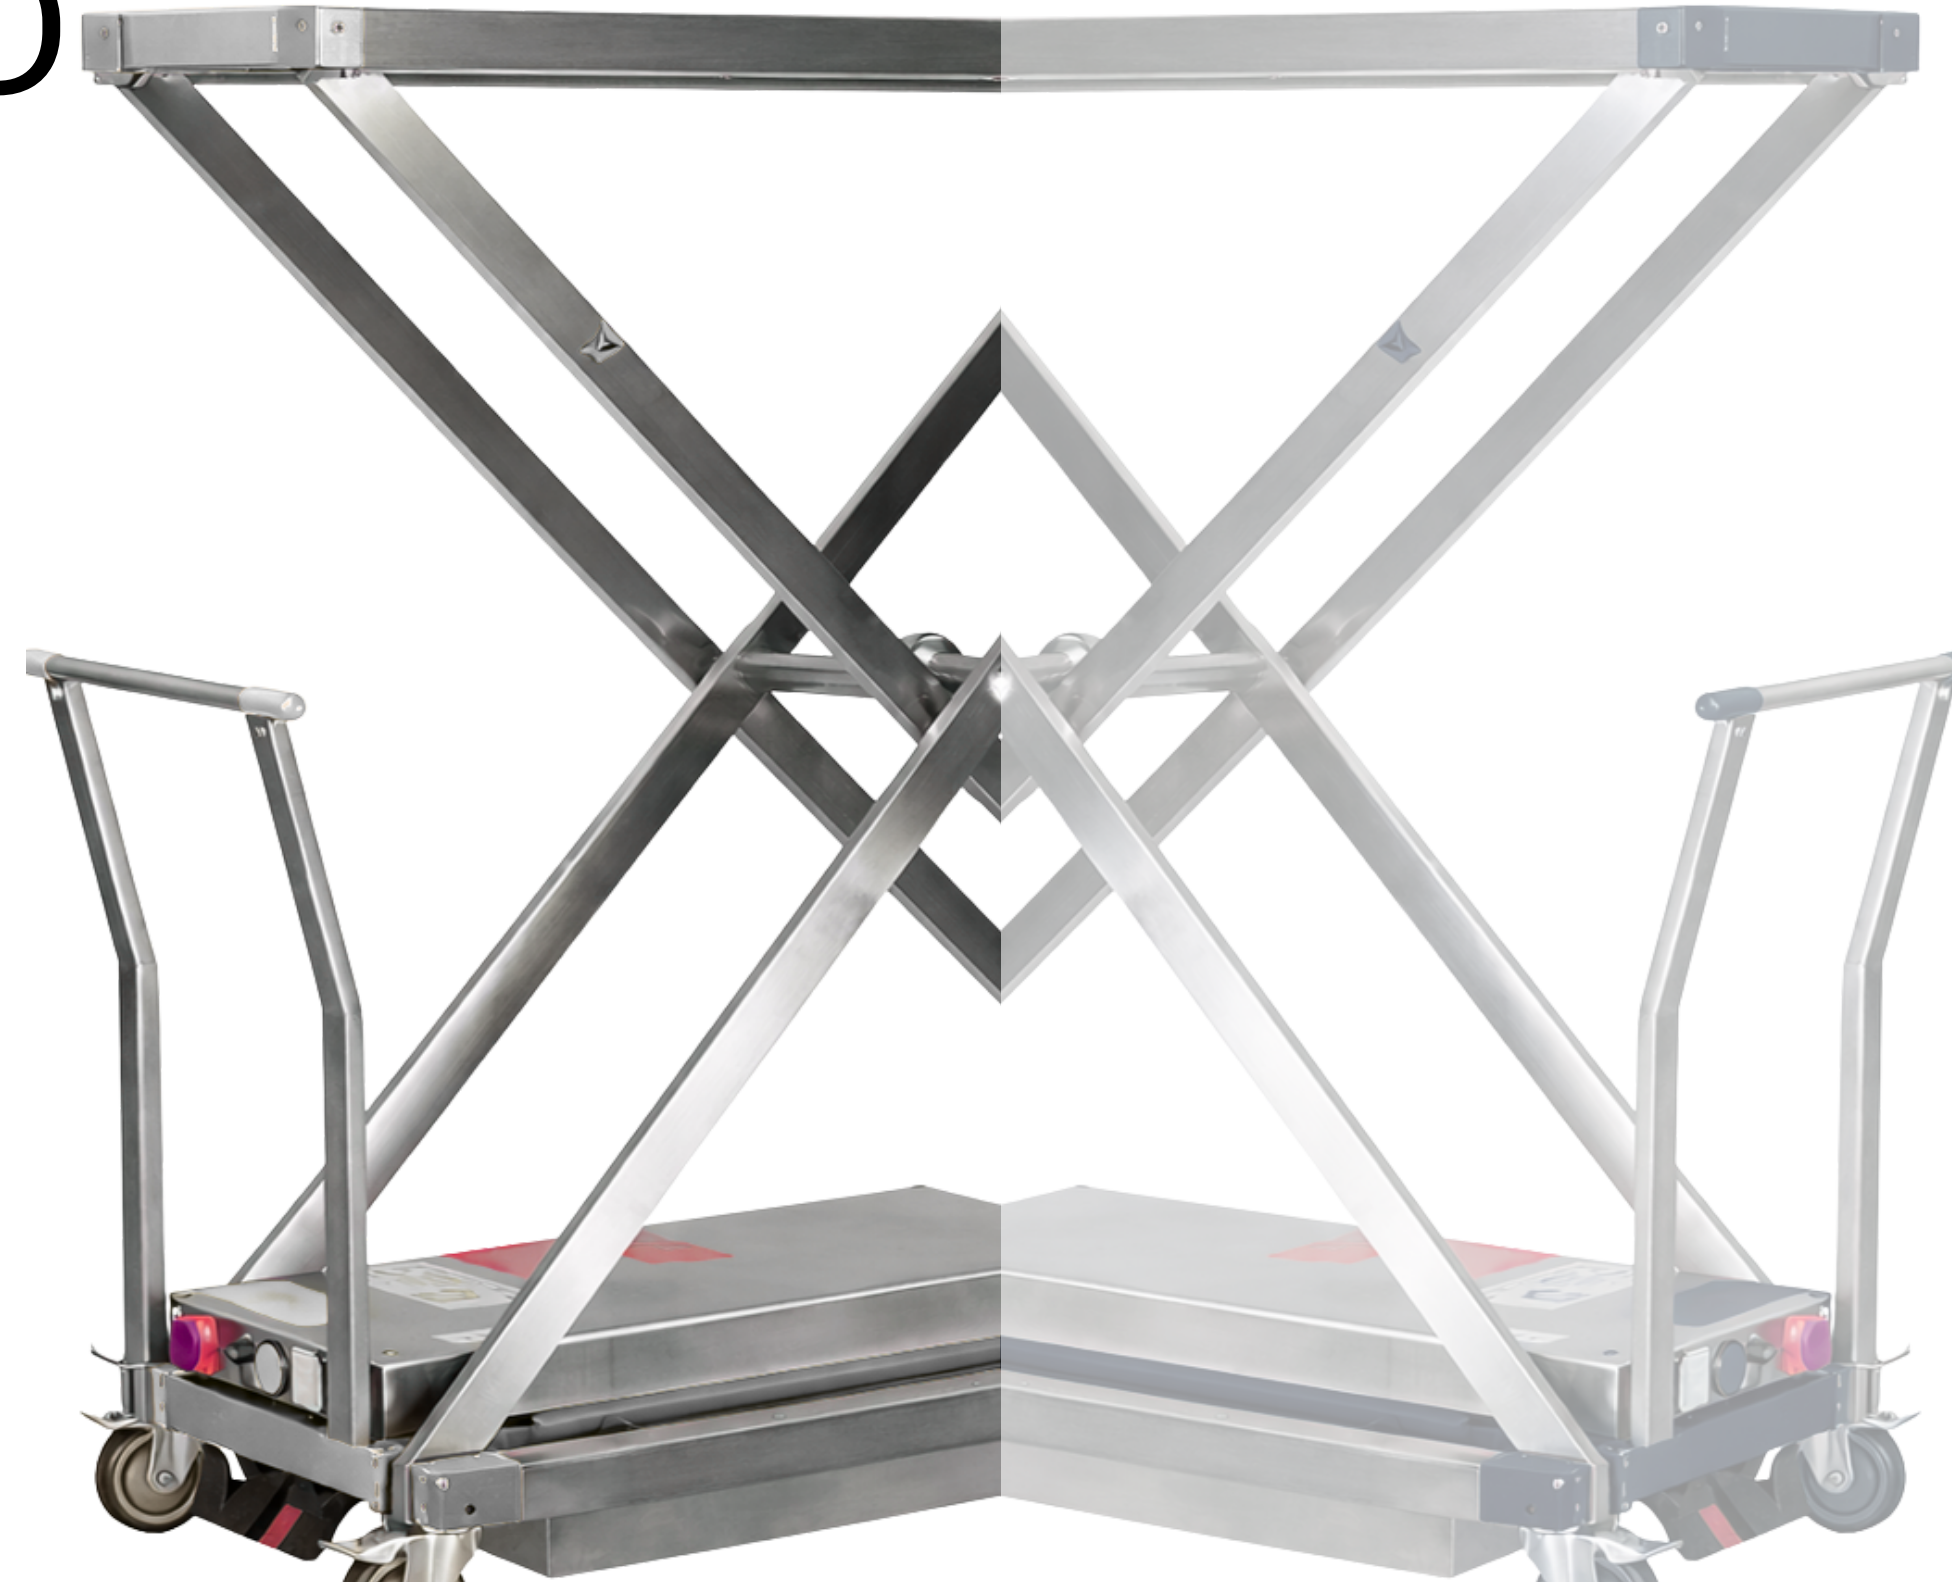

AVIATION GROUND SUPPORT AND LOGISTICS EQUIPMENT

Product Groups:

- Manual transport carts
- Platform-type service carts
- Component lifting units
- Scissor lift systems
- Aircraft maintenance support equipment
- Hangar logistics solutions

INDUSTRIAL STORAGE AND PPE SYSTEMS

Professional storage solutions designed for the safe, organized, and controlled storage of personal protective equipment (PPE), personnel belongings, and sensitive equipment used in aviation, manufacturing, and technical operations.

With a comprehensive product portfolio ranging from PPE cabinets to personal lockers and ESD-resistant systems, they provide solutions suitable for both standard and high-sensitivity working environments.

www.kocmet.com

INDUSTRIAL STORAGE AND PPE SYSTEMS

Product Scope

PPE (Personal Protective Equipment) cabinets
Personnel lockers
Multi-compartment industrial cabinet systems
ESD (Electrostatic Discharge) controlled cabinets
Sensitive equipment storage solutions

INDUSTRIAL STORAGE AND PPE SYSTEMS

Designed for the organized, secure, and efficient storage of hand tools used in maintenance and service operations.

Its multi-drawer configuration and spacious top storage area enable quick on-site access and enhanced operational efficiency.

Key Features:

Durable steel body construction

- Lockable top lid system
- Smooth-glide drawer rail system
- Ergonomic carrying handle
- Industrial-grade electrostatic powder coating
- Long-life design for heavy-duty use

www.kocmet.com

MOBILE SERVICES TOOL

Mobile Maintenance Support Unit

Designed to enable technicians to perform low-level maintenance operations comfortably and efficiently in apron and hangar environments.

Key Features:

- Industrial-grade steel construction
- Soft and ergonomic seat cushion
- 360° swivel heavy-duty casters
- Integrated lower compartment for parts and hand tools
- Compact design for easy use in confined spaces
- Electrostatic powder-coated finish

www.kocmet.com

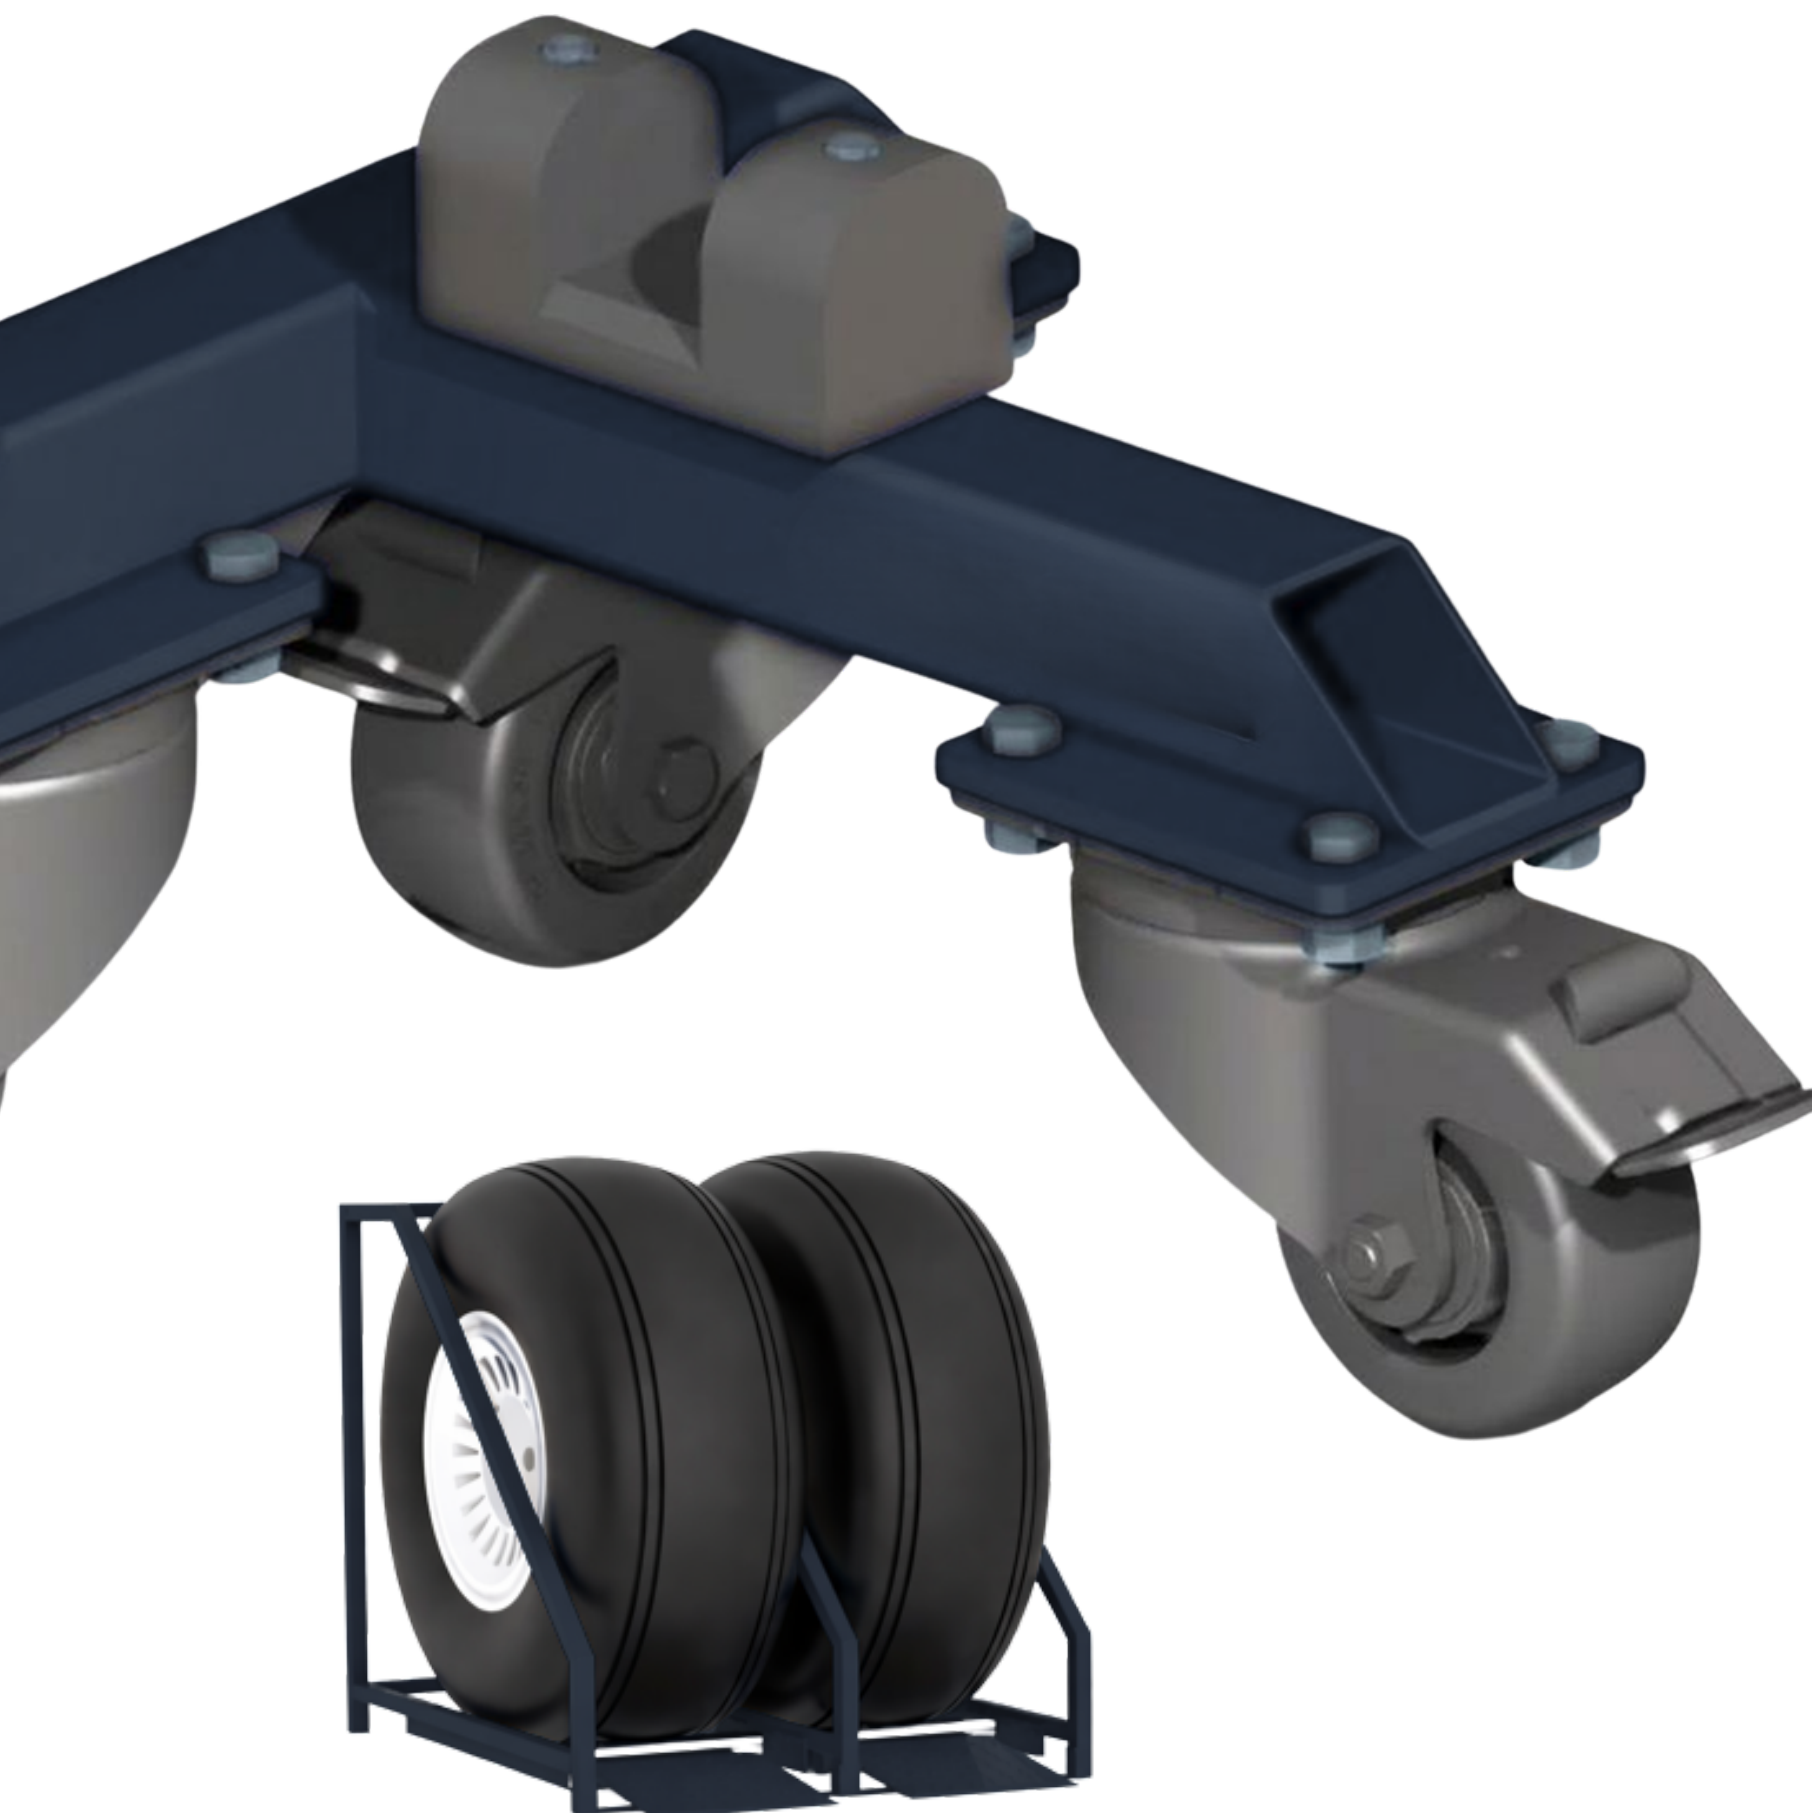

TROLLEYS

A low-profile mobile transport unit engineered for the controlled and secure handling of aviation equipment and aircraft components.

Key Features:

- High load-capacity steel body construction
- Heavy-duty lockable wheel system
- Low center-of-gravity design
- Integrated load securing points
- Precise maneuverability within hangar environments
